

The background of the slide features a scenic landscape of rolling green hills and mountains under a sky filled with warm, golden and orange clouds at sunset. In the foreground, a dark wooden fence runs diagonally across the frame, with a single vertical post on the left side.

An Introduction to EIA, and Canada's Federal Impact Assessment Act

Kevin Hanna

Tsilhqot'in National Government Webinar
on EIA and Indigenous Led EIA

July 7 & 8, 2021

CEAR
CENTRE FOR ENVIRONMENTAL
ASSESSMENT RESEARCH

Presented by

Kevin Hanna, Director Centre for Environmental Assessment Research at UBC. Co-chair of the Technical Advisory committee on Science and Knowledge for the Impact Assessment Agency of Canada (IAAC)

Acknowledgements: Selected slides provided by IAAC and adapted for this workshop

1. An Introduction to EIA

Environmental Impact Assessment

- Environmental Impact Assessment (EIA), Impact Assessment, Environmental Assessment
- An American Origin... Ontario had the first provincial EIA law, Canada was later.
- Process to identify impacts that may come from an action... ID options to eliminate, mitigate, or accept
- Systematic
- **Project-based**
- Many types of assessments within EIA

- Does not make a decision, it informs decision-makers
- Balance economic, environmental, and social objectives
- Mitigate negative impacts
- Not about stopping development, but making it better
- 14 assessment processes in Canada
- They can overlap

2. The Federal Impact Assessment Process

Federal Impact Assessment...

A planning and decision-making tool used to assess:

- positive and negative environmental, economic, health, and social effects of proposed projects
- impacts to Indigenous groups and rights of Indigenous peoples

The Impact Assessment Agency of Canada is responsible for conducting impact assessments under the *Impact Assessment Act*

Purpose

- To foster **sustainability**, ensure respect of the **rights of Indigenous peoples**
- To include environmental, social, health and economic factors
- To establish a **fair, predictable and efficient** impact assessment process
- To consider **positive and adverse effects**
- To include early, inclusive and meaningful **public engagement**
- To promote **partnerships with Indigenous peoples**
- To ensure **decisions** are based on **science, Indigenous knowledge** and other sources of **evidence**
- To assess **cumulative effects** within a region

Projects subject to the Act

- Designated projects are described in the *Physical Activities Regulations* (Project List)
- Minister may designate any project not described in regulations, based on factors set in the legislation
- Non-designated projects on federal lands and outside Canada.

EXAMPLES

- Renewable energy
- Oil and gas
- Linear and transportation-related
- Marine and freshwater
- Mining
- Nuclear
- Hazardous waste
- Federal lands and protected areas

Types of Impact Assessment

Designated Projects

By the Agency

- leads the assessment and engagement process
- works collaboratively with other jurisdictions and federal expert departments to carry out the impact assessment

By a Review Panel

- leads the assessment and engagement process
- holds public hearings to allow the public, the proponent, Indigenous groups, federal authorities and all other interested participants to provide their views and ask questions about the information on the record

Cooperation with other Jurisdictions

“One project, one assessment”

To reduce duplication and increase efficiency and certainty

Participation of Indigenous Peoples

For the Agency, Indigenous participation has 3 objectives:

1. Fulfill the Crown's constitutional obligations to consult and accommodate, where appropriate, Indigenous peoples whose Aboriginal and Treaty rights may be adversely impacted by a proposed project.
2. Address statutory obligations under the *Act* to:
 - consult potentially impacted Indigenous groups;
 - consider potential effects on Indigenous peoples and any potential adverse impacts on the rights of Indigenous peoples;
 - consider Indigenous knowledge provided;
 - consider Indigenous culture; and
 - advance cooperation with Indigenous jurisdictions.
3. Advance reconciliation by increasing opportunities for collaborating or partnering with Indigenous peoples via a spectrum of engagement:
 - **Participation**,
 - **Collaboration**
 - **Partnership**

The Indigenous Engagement and Partnership Plan will outline the Indigenous participation.

Parties Involved in the Impact Assessment Process

Proponent

Indigenous groups

Public

Federal authorities

Other
jurisdictions

Governor in council

Life cycle regulators

Impact Assessment Process Overview

Phase 1: Planning

Timeframe: 180 days

Phase 1: Planning

Key Steps and Timelines for the first 80 days

Agency posts Initial Project Description and engagement starts

20 - 30 DAYS (service standard)

DAY 1

Consultations and engagement continue

Agency prepares Summary of Issues

10 DAYS

Proponent submits Detailed Project Description including response to summary of issues

30 DAYS

Agency determines if impact assessment is required

10 - 20 DAYS

DAY 80

Key documents

INITIAL PROJECT DESCRIPTION

SUMMARY OF ISSUES

DETAILED PROJECT DESCRIPTION AND RESPONSE TO SUMMARY OF ISSUES

Phase 1: Planning

Key Steps and Timelines for remaining 100 days

Agency drafts Tailored Impact Statement Guidelines (TISG) and Plans
30 DAYS (service standard)

Agency engages on TISG and Plans
30 DAYS

Agency finalizes TISG and Plans
40 DAYS

Agency issues Notice of Commencement and posts final TISG & Plans

DAY 80

Consultations and engagement continue

DAY 180

Key documents

Subsection 22(1): Factors to be Considered in an Impact Assessment

(a)	Changes to the environment or to health, social or economic conditions (including malfunctions, accidents and cumulative effects)
(b)	Mitigation measures
(c)	Impacts on any Indigenous group and on the rights of Indigenous peoples
(d)	The purpose and need for the project
(e)	Alternative means of carrying out the project
(f)	Alternatives to the designated project
(g)	Indigenous knowledge
(h)	Sustainability considerations
(i)	Environmental obligations and its climate change considerations
(j)	Any change to the project that may be caused by the environment
(k)	Follow-up program requirements

Subsection 22(1): Factors to be Considered in an Impact Assessment

(l)	Considerations related to Indigenous cultures
(m)	Community knowledge
(n)	Comments received from the public
(o)	Comments from another jurisdictions
(p)	Any relevant strategic or regional assessment
(q)	Any assessment conducted by or on behalf of an Indigenous governing body
(r)	Any study or plan that is conducted or prepared by a jurisdiction — or an Indigenous governing body — that is in respect of a region related to the designated project
(s)	A gender based analysis (intersection of sex and gender with other identity factors)
(t)	Any other matter relevant to the impact assessment that the Agency or the Minister requires to be taken into account

Phase 2: Impact Statement

Key Steps and Timelines

Phase 3: Impact Assessment

Key Steps and Timelines for Agency-led IAs

Phase 4: Decision-Making

Key Steps and Timelines

A DECISION BY MINISTER MINISTERIAL DECISION

30 DAYS

Impact Assessment Report
posted on Registry site

Minister's Decision
Statement

ss. 60 (1)
s. 62
ss. 65 (3)

B DECISION REFERRED TO GOVERNOR IN COUNCIL (GIC) for CONSIDERATION

90 DAYS

Impact Assessment Report
posted on Registry site

Notice of referral to the GIC
+ reasons for referral posted
on Registry

GIC's Public Interest
Determination

Minister's Decision
Statement

Decision Statement issued by the Minister to the proponent must include:

public interest determination

s. 65

ss. 68(1)

reasons for the determination

enforceable conditions

expiry date

description of the project

The Minister can amend decision statements

Phase 5: Post-decision

Key Steps and Timelines

Proponent

- Seeks regulatory approvals, as required
- Begins project within time limits identified in the Decision Statement
- Implements follow-up program
- Complies with conditions associated with Decision Statement

Agency

- Posts follow-up documentation on Registry
- May establish monitoring committees
- Promotes, educates, monitors, and facilitates compliance

Regional and Strategic Assessments

Regional assessments conducted by a committee or the Agency with the opportunity for agreements with jurisdictions (s.92 and 93)

Both taken into account in impact assessments of designated projects (par. 22(1)(p))

Strategic assessments to help to align projects with government policy, plans and programs (s.95)

Objectives: better understanding of issues outside of the context of individual project assessments; inform IA and decision-making

Summary

Seen as a planning and decision-making tool

Participant engagement opportunities are available throughout the process

5 phases to the federal process:

1. **Planning:** Documents developed in the Planning Phase specify information requirements and engagement opportunities throughout the impact assessment process
2. **Impact Statement:** The proponent outlines and evaluates potential impacts of a designated project
3. **Impact Assessment:** The Agency outlines and evaluates potential impacts of a designated project
4. **Decision-making:** Public interest decisions made by the Minister or Governor in Council are based on information in the Impact Assessment Report and the public interest factors
5. **Post Decision:** Compliance is verified through a follow-up program and activities to promote, educate, monitor, and facilitate compliance with the *Impact Assessment Act* and Decision Statement

Phase 1: Objectives of products

Initial Project Description	High-level description of the proposed project
Summary of Issues	List of issues provided by the Agency following engagement and cooperation discussions
Response to the Summary of Issues	Notice prepared by the proponent outlining how they plan to address the issues described in the Summary of Issues
Detailed Project Description	Document containing updated information about the designated project and information about the possible environmental, social, health and economic effects of the project
Public Participation Plan	Document outlining how the public would be engaged throughout the impact assessment process
Indigenous Engagement and Partnership Plan	Document describing how Indigenous groups would be engaged throughout the impact assessment process
Impact Assessment Cooperation Plan	Document describing how the Agency will work with other jurisdictions throughout the impact assessment process
Permitting Plan	Document outlining the anticipated permits, licenses and authorizations required for the designated project
Tailored Impact Assessment Guidelines	Document outlining the information required in the proponent's Impact Statement
Notice of Commencement	Notice issued by the Agency before the end of the 180-day time limit that sets out the information and studies necessary to conduct the impact assessment
